Summary

Communications professional with an engineering foundation, combining hands-on experience in stakeholder communications, digital content production, and front-end web editing within international energy and policy organizations. During a six-month engagement at ENTSO-E, I produced presentations, briefings, and Written Voting Procedures for the Smart Energy Expert Group (European Commission) and TSO stakeholders, translating complex energy data concepts into accessible, decision-ready material. My engineering background (MSc Modeling for Decision Making and Applications to Logistics; BSc Electrical Power & Energy Engineering) enables me to grasp the technical, market, and political implications of ENTSO-E's work — not merely report on them. Skilled in Python, HTML, and Google Analytics, with a strong eye on digital publishing and branding. Fluent in English with excellent copywriting and editing abilities. My long-term career aspiration is to build a sustained career in communications and digital engagement within ENTSO-E and the European energy policy space.

Education

Erasmus Mundus Joint Master's Full Scholarship – Energy Systems Optimization.

- **Semester 4:** Energy Data Space Internship at ENTSO-E.
- **Semester 3:** Autonomous University of Barcelona. [GPA: 4.0/4.0].
- **Semester 2:** Vienna University of Technology. [GPA: 4.0/4.0].
- **Semester 1:** Università degli Studi dell'Aquila. [GPA: 3.0/4.0].

Sep 2024 - Jul 2026

Brussels, Belgium
Barcelona, Spain
Vienna, Austria
L'Aquila, Italy

Bachelor of Science – Electrical Power and Renewable Energy Engineering. Ain Shams University.

- **Full Scholarship with GPA: 3.42/4.0** (Dean's List of Honors). Rank: **Top 5%**.
- **Thesis Title:** "Towards Efficient Energy Usage at Ain Shams University Campus":

Aug 2019 – Jul 2023

Cairo, Egypt

Semester Abroad - Energy Engineering. University of Nebraska-Lincoln.

- **Full Scholarship with GPA: 3.75/4.0** (Dean's List of Honors).
- **Capstone Project:** Wind Farm Design to Provide Zero-Carbon Energy to Hettinger City:

Aug 2022 – Dec 2022

Nebraska, USA

Work Experience

Energy Data Space Intern | ENTSO-E.

- Drafted and produced communication materials — presentations, briefings, and Written Voting Procedures-translating complex data space concepts into accessible language for TSO stakeholders.
- Supported the development of internal and external communications for the Common European Energy Data Space, including summaries and updates for cross-border collaboration.
- Collaborated with TSO representatives across Europe to identify communication needs, ensuring Consistent messaging and alignment on data space governance.
- Gained insight into the technical, market, and political implications of ENTSO-E's communication outputs.

Feb 2026 – Jul 2026

Brussels, Belgium

Green Energy Engineer | United Nations Development Program.

- Developed and maintained communication materials: reports, presentations, and stakeholder updates to support project visibility across 10 countries.
- Authored 8 comprehensive business cases and presented them to government and private-sector stakeholders, communicating complex technical and financial information clearly.
- Coordinated with local partners, UN colleagues, and government stakeholders to ensure effective information flow.

Feb 2024 – Jul 2024

Copenhagen, Denmark

Digital Analytics Program | Mastercard Foundation & ALX.

- Applied HTML to support front-end web editing and maintenance, ensuring digital platforms remained accessible, performant, and optimized for user experience (UX/UI) across devices.
- Utilized Google Analytics and PowerBI to monitor website traffic, analyze SEO performance, and report on user engagement, translating complex datasets into actionable insights for content optimization.
- Drafted and designed engaging digital content, including LinkedIn Posts and visual assets, utilizing strong copywriting and editing abilities to communicate technical energy insights to diverse, non-technical stakeholders.
- Applied SEO best practices to improve online visibility while managing complex priorities and tight deadlines within a multicultural, fast-paced environment.

May 2023 – Dec 2023

Cairo, Egypt.

Power Systems Intern SIEMENS	Jun 2022 – Sep 2022
- Performed optimal power flow analysis on a 6-bus test grid using ETAP and PSS®E, identifying configurations that reduced power losses by 8%. - Co-designed a feasibility study for a microgrid integrating 6.4 MW solar PV system and 12 MW wind farm.	Cairo, Egypt

Leadership & Volunteering Experience

UN Graduate Study Programme Participant and Egypt Representative United Nations Office at Geneva.	Jun - Jul 2026
- Drafted policy recommendations on AI governance and emerging technologies through interdisciplinary research with UN agencies (ILO, OHCHR, ITU, WHO, UNHCR). - Collaborated with an international cohort of 56 graduate students from 42 countries, engaging with UN officials, diplomats, and tech experts on digital cooperation, humanitarian innovation, and international security. - Explored multilateral governance via guided tours of the Palais des Nations and CERN, attendance at the AI for Good Global Summit, and diplomatic networking events with EU and Geneva representatives.	Geneva, Switzerland
EULiST Student Conference Representative IMT Nord Europe.	Jul 2025
- Delivered a keynote presentation on global solar energy deployment, translating technical project experience from my UNDP role into strategic insights on community empowerment and energy transition. - Led my team securing 1st Place in the EULiST Green Hackathon by developing a proposal for a low-cost, student-led recycling system to reduce university carbon footprints.	Douai, France
Madagascar Solar Project Volunteer Engineers Without Borders.	Sep 2022 – Dec 2022
Co-developed a comprehensive technical manual for the installation and maintenance of photovoltaic systems to provide reliable electricity to 6 remote schools in Madagascar.	Nebraska, USA

Core Competencies & Technical Skills

- Data Analysis & Visualization Project Management Electrical Design (IEC Standards) Renewable Energy Systems Business Case Development Grid Integration Copy Writing & Editing. Programming & Data: HTML, Power BI, Python, Google Analytics, Microsoft 365 (Word, Excel, Teams, Outlook, SharePoint). Electrical Design: ETAP, PSS/E, AutoCAD.	Energy Simulation: PVsyst, PV*SOL, HOMER Pro, RETScreen.

Languages

• Arabic (Native)	• English (Advanced)(C1)	• German (Pre-intermediate)(A2)	• French (Beginner)(A1)
-------------------	--------------------------	---------------------------------	-------------------------

Achievements & Honors

- Secured 1st Place in the EULiST Green Hackathon for my proposal of a low-cost, student-led campus recycling system. (2025) - Achieved 3rd Place internationally among 30 teams in the Net Zero Carbon Campus competition by Kingston University. (2023) - Won 1st Place in the Collaborative Design Challenge by developing an innovative engineering solution. (2022) - Won 1st Place among 12 teams in a Schneider Electric design initiative for my electrical panel design. (2021) - Awarded a full undergraduate scholarship from USAID & MIT for academic excellence and leadership potential. (2019-2023)
